

Space

Planet - a celestial body moving in an orbit round a star.

Orbit - a repetitive journey made by an object around another.

Spherical - 'ball' shaped, appearing to be perfectly round from a distance.

Rotation - The Earth continually rotates on its own axis. This gives us night and day.

Solar - anything related to the sun.

Stargazers

Space - an area of the universe which is unoccupied and free.

Our planets:

- Mercury
- Venus
- Earth
- Mars
- Jupiter
- Saturn
- Uranus
- Neptune

The universe

The Universe: The place where everything exists.

Galaxies: a system of millions or billions of stars, together with gas and dust.

Our solar system: the order of planets in which they are found.

Wonder

Genre: Adventure Fiction

Author— R. J. Palacio

August (Auggie) Pullman was born with a severe facial difference that, up until now, has prevented him from going to a mainstream school.

Starting 5th grade at Beecher Prep, Auggie wants nothing more than to be treated as an ordinary kid—but his new classmates can't get past his extraordinary face. Wonder begins from

Auggie's point of view, but soon switches to include the perspectives of his classmates, his sister, her boyfriend, and others. These voices converge to portray a community as it struggles with differences, and challenges readers, both young and old, to wonder about the true nature of empathy, compassion, acceptance, friendship, and—ultimately—kindness. Auggie is a hero for the ages, one who proves that you can't blend in when you were born to stand out.
