Dear Parents/Carers,

During this half term, we would like all the children in Year 4 to produce a Home Learning Project. We believe this gives our children the opportunity to share their learning with family at home, engages them in their learning and allows them to share their knowledge, skills and talents with their peers.

The children are encouraged to choose the project idea they would like to create and how they wish to present it to the rest of the class. This half term's project needs to be completed and returned to school by **Monday, 28th March** and the children will be given the chance to share their learning with the rest of their class during that week. If your child needs any paper or other resources that school can provide, please encourage them to ask their class teacher.

Project Ideas

- Find out about the effects of emissions on the environment. Design a poster persuading people to think more carefully about their carbon footprint.
- Create a list of as many different modes of transport as possible. Can you sort them in a creative way?
- Conduct a traffic survey on your street. What types of transport travel along it? How busy is it?
- Create a road safety poster to encourage people to stay safe when they're out and about.
- If you could travel anywhere in the world, where would it be? How would you get there? Create an itinerary for your dream location.
- Find out how hot air balloons work and create a labelled diagram/explanation.
- Create a collage of different modes of transport.
- Talk with your family members about how transport has changed since they were young. Present your findings in an interesting way.

Thank you for your continued support

The Year 4 Team
